

A Reason to Believe Creationism

There are many reasons to believe that what the Bible says about the beginning of life on the earth is true. Your job in Biology class over the next few days will be to use a computer to do some research in this area. You will:

1. Look into some of the reasons to believe Biblical Creationism is true. (Note that you are looking for positive reasons to believe, not for reasons to not believe evolution.)
2. Choose one reason that you think is a particularly strong reason.
3. Gather information about this particular reason. This information should come from at least two credible sources.
4. Organize that information into a list (bullet points).
5. Use the list of information to write a clear explanation about this reason to believe in Biblical Creationism. This explanation:
 - a. must be **over** 600 words long (double spaced, 12 point Calibri font)
 - b. No direct quotes from a source are allowed. It all must be written in your own words.
 - c. must have a works cited page with correct entries! (Microsoft Word has a tool to help you do this correctly!) The works cited is NOT part of the 600 words.
 - d. must have a clear and logical explanation of the evidence you researched and how it supports Biblical Creationism.
 - e. should include pictures, diagrams or graphs as appropriate to your topic. These must also be cited!

I intend for this work to be accomplished during Biology class. If you are unable to accomplish this, you will have to do some work on this at home as well. It would be a good idea to use your newly available access to Office 365 and save your work to OneDrive so you can access it at home, in study hall, or anywhere that you have internet access.

You will submit the assignment as a Word document through email (abrads@xeniachristian.com). You can use the email access provided by Office 365.

Your submission must include the all of the items mentioned in #4 and #5 above.
