

## Environmental Disaster Project

You will create an educational presentation on a major environmental disaster. The presentation will include:

- descriptions of:
  - what happened.
  - where it happened.
    - Include information about the area, especially environmental information.
  - what caused it.
  - what were the effects.
    - short term
    - long term
  - what steps were taken to clean up or reduce the impact.
  - the extent to which the area has recovered from the disaster.
  - the effects of the disaster which remain today.
  - similar environmental disaster.
  - other relevant or interesting information.
- a script to be used when presenting (the script should vary from and elaborate upon the information in the slide show – do NOT just read the slides).
- a PowerPoint slide show which supports the presentation with information, pictures, diagrams, maps, graphs, charts, etc.
- a clear and extensive list of the resources used to assemble the project formatted as an MLA bibliography

Circle your assigned disaster:

Exxon Valdez	Chestnut Blight	Deepwater Horizon	Chernobyl Nuclear Plant
Dutch Elm Disease	Love Canal	Fukushima Nuclear Plant	The Dust Bowl
Castle Bravo	Kuwait Oil Fires	Amoco Cadiz
